Export Prospects

Thailand's export trends for H2 2026 are projected to maintain strong growth, driven by the continuous expansion in demand for electronic products. This is despite negative pressures from escalating geopolitical tensions and uncertainties surrounding US trade measures and import tariffs. In response, the Ministry of Commerce has implemented several proactive strategies. These include accelerating negotiations to finalize new trade agreements, such as the Thailand-EU and ASEAN-Canada FTAs, clarifying concerns and negotiating tariffs with the US, and collaborating with ISOC (Internal Security Operations Command) to tackle nominee businesses and illegal multinational investments. These efforts aim to protect Thai entrepreneurs and ensure sustainable export stability for the country.
