Global Trade Atlas

Ministry of Commerce, Kingdom of Thailand : Country coverage & user features

12 Dec 2018

Global Trade Atlas
The world's most complete and accurate set of trade numbers

- Global Trade Atlas (GTA) is a **comprehensive database of worldwide trade statistics** and provides web-based search and analysis tools for users to access the trade data.

- **GTA is a market-leading solution** that provides a global view of imports and exports for every commodity at the most detailed level of harmonized code.

- **Extra Data Fields**: Additional data points to provide trade data by transport modes, ports and regions.

- **Currency and Unit Conversions**: Features include currency and unit conversions and the ability to create user-defined commodity groups.

- **Multiple Languages**: The application is available in multiple languages including Chinese (Simplified and Traditional), Spanish, German, Korean, Japanese, French and Italian.

GTA is built upon **high-quality trade data sources** combined with rigorous data vetting and integration processes that are ISO certified.

GTA Trade Data Coverage in Numbers

180+ Total Countries with Trade Data	**115** Monthly Datasets from Reporting Countries*	**96** Unique Countries for Monthly Trade Data*
50+ Countries and Regions with Additional Data Points	**32** Currencies	**11** Languages
98% Of All Global Trade Covered**	**95%** Of Global Trade Covered Monthly**	

* Includes data from 8 new countries added in the past ~12 months
** Based on a World Bank estimates for global merchandise trade in 2016

# Global Trade Atlas: **Country Coverage**
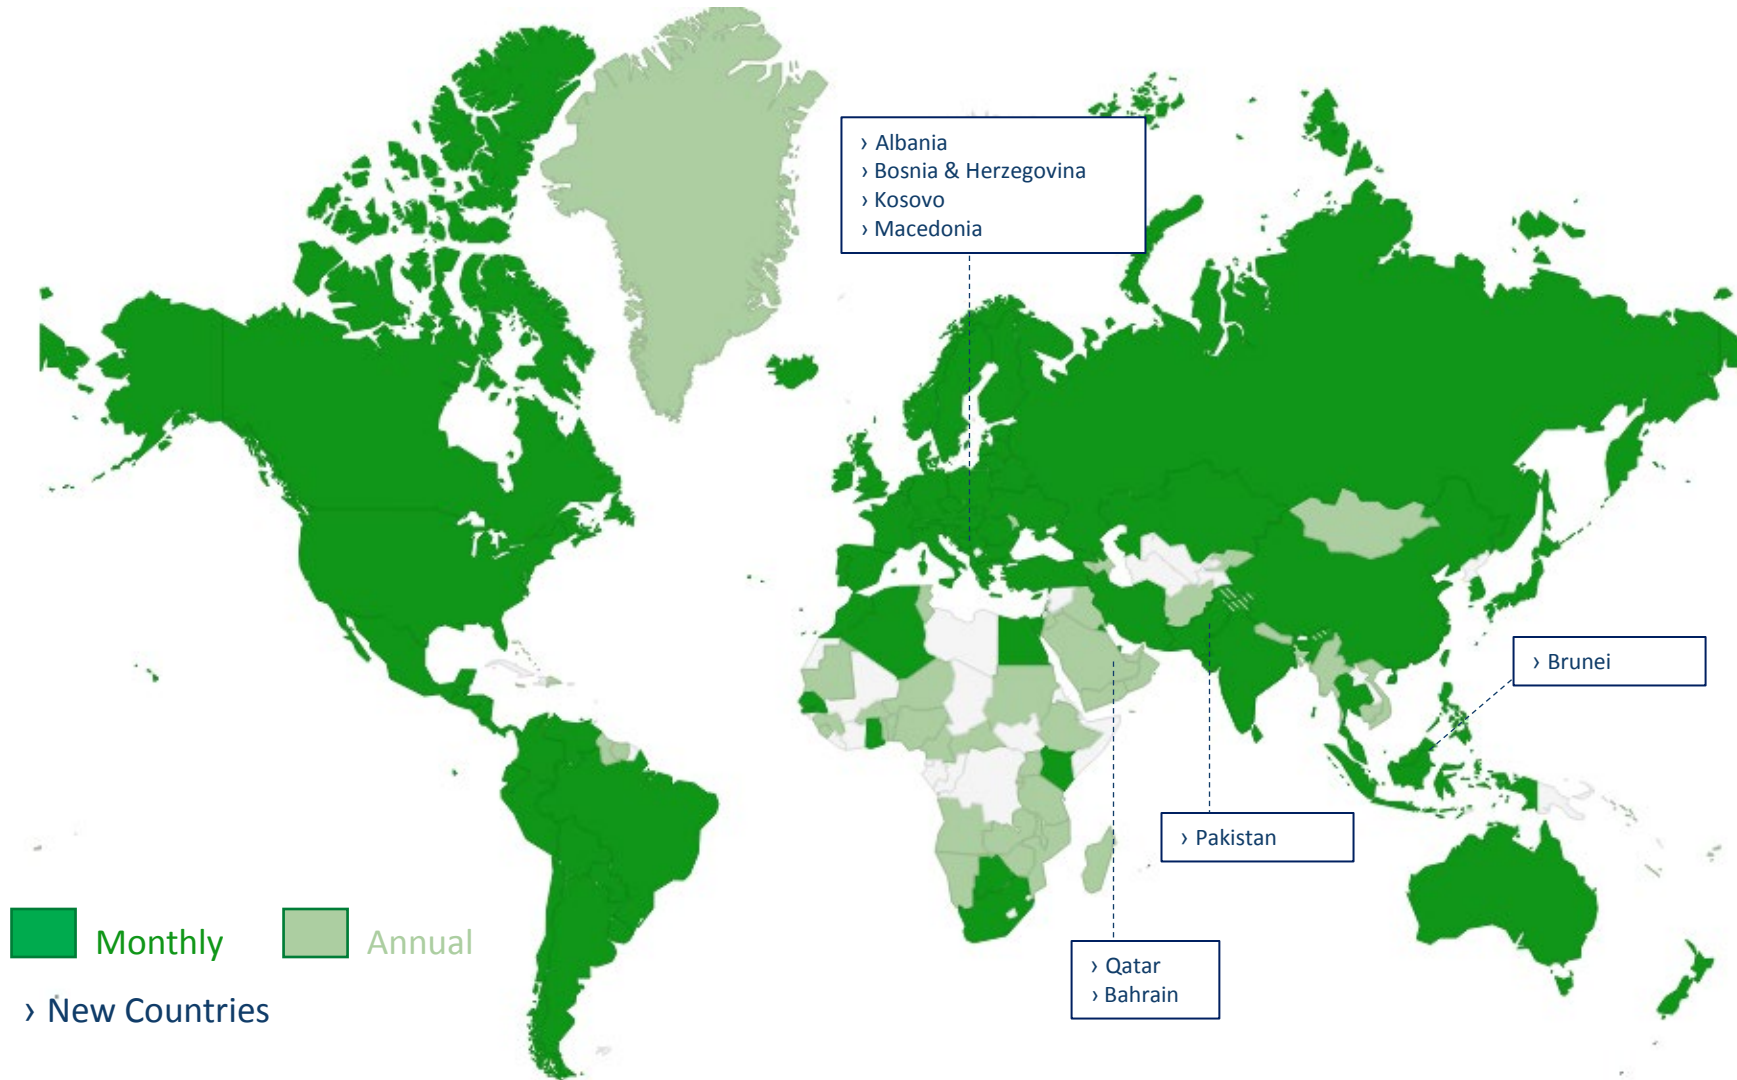

Total Countries Reported: 180+

- **96** monthly reporting countries with **115** monthly data sets†

- **98%** of estimated global trade covered, of which **95%** of trade covered monthly**

- **8** new countries added in past 12 months, and continued investment in further coverage expansion.

› Albania
› Bosnia & Herzegovina
› Kosovo
› Macedonia

› Brunei

› Pakistan

› Qatar
› Bahrain

Monthly   Annual

› New Countries

** Based on a World Bank estimate of global merchandise trade in 2016 at $32.3 trillion.

† Some reporting countries have multiple data sets with varying sources or methodologies.

Extra Data Fields: Ports, Customs Districts, and Provinces
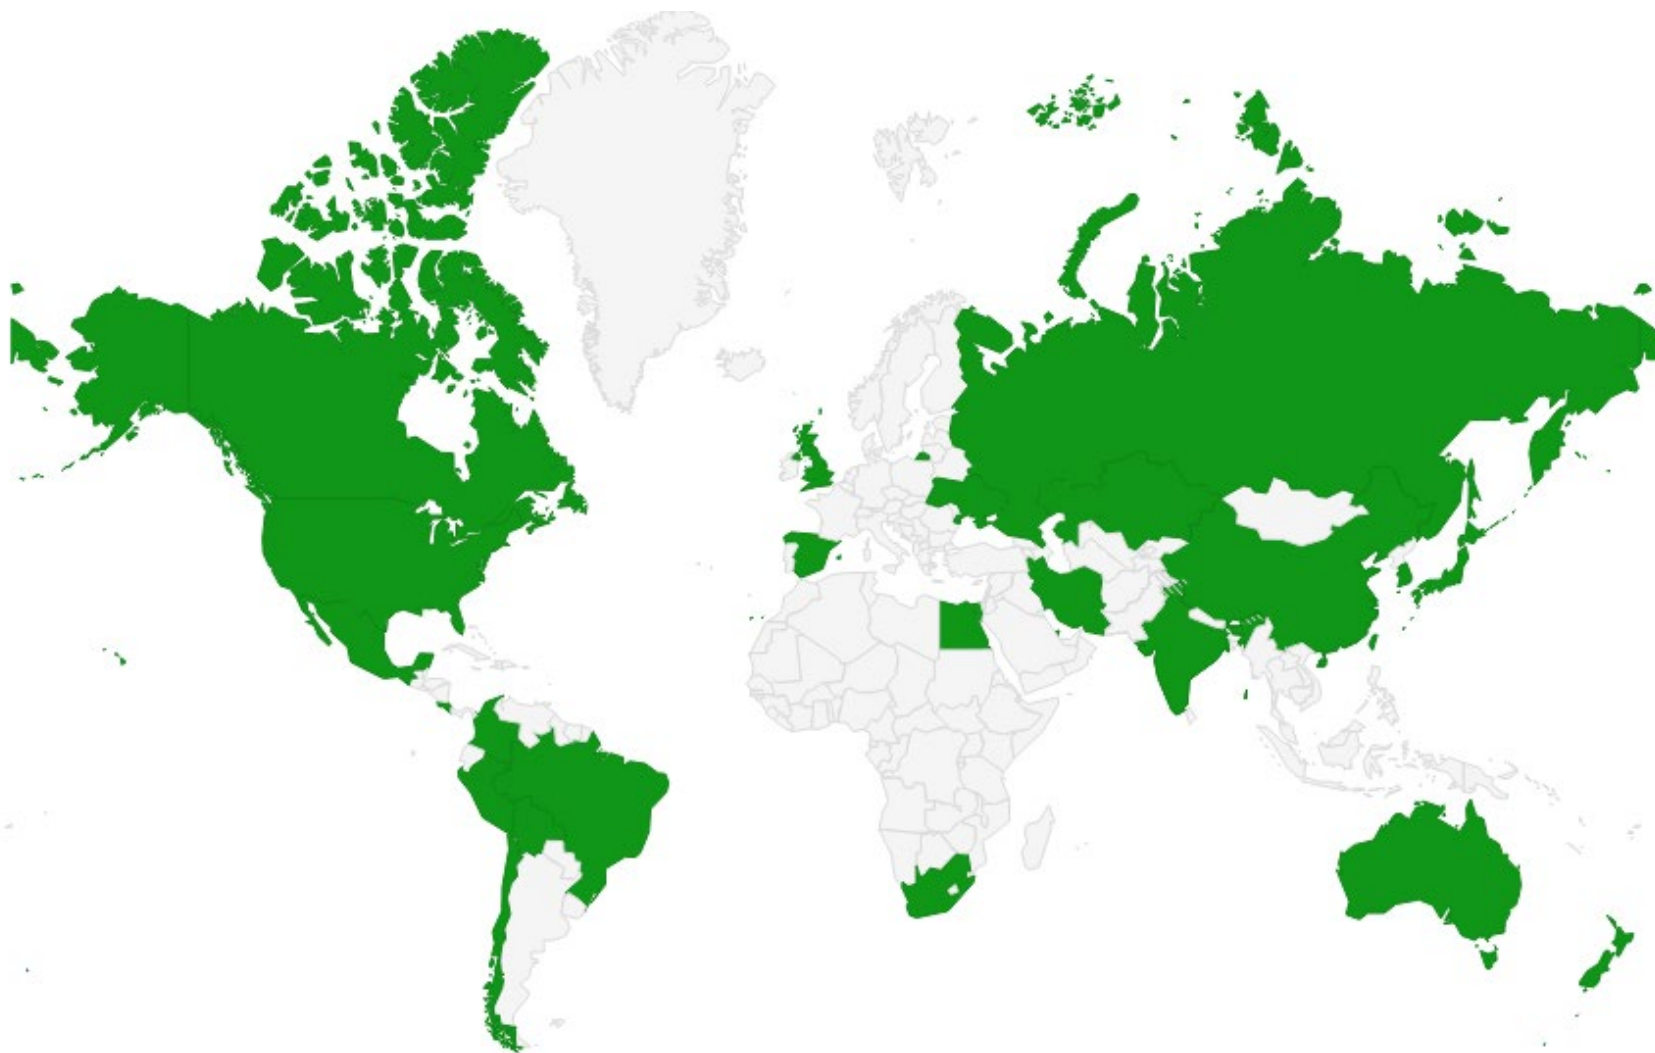

Granular trade data available by detailed locations for countries accounting for more than 50% of global trade**

25 countries with trade data reported by ports, customs districts and provinces

** Location detail varies by reporting country and may be a port, customs district, or province.
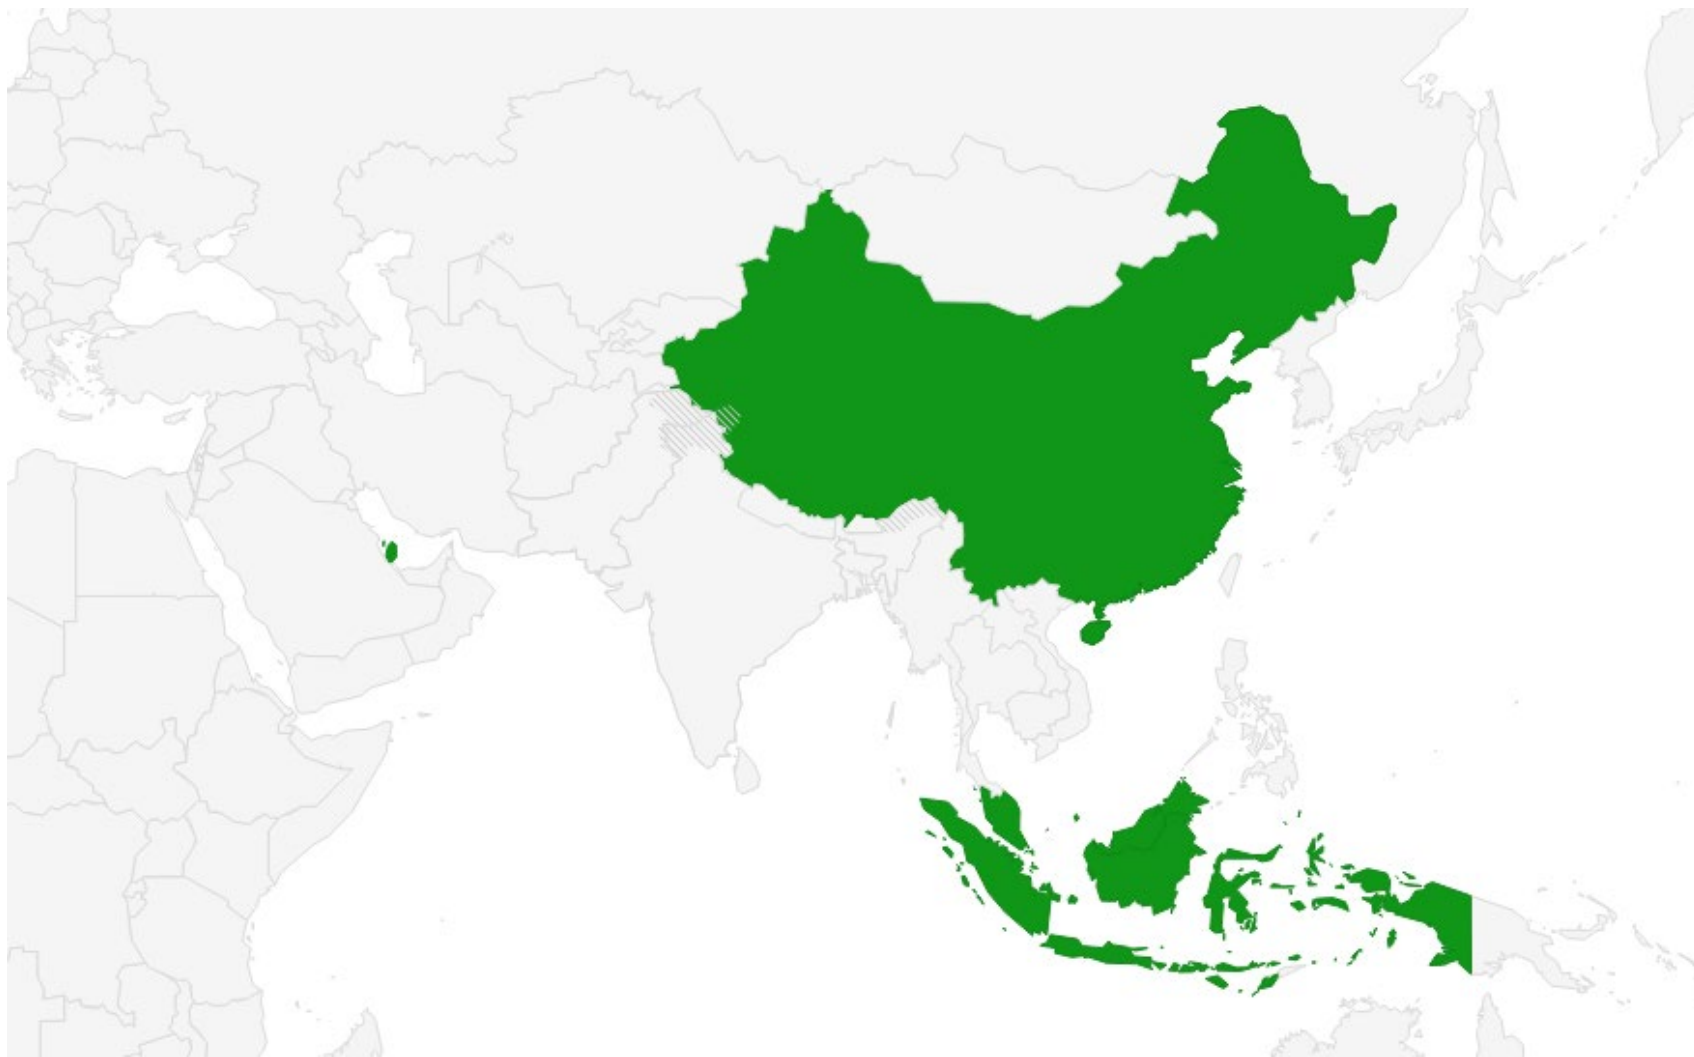

Extra Data Fields: Transportation Modes
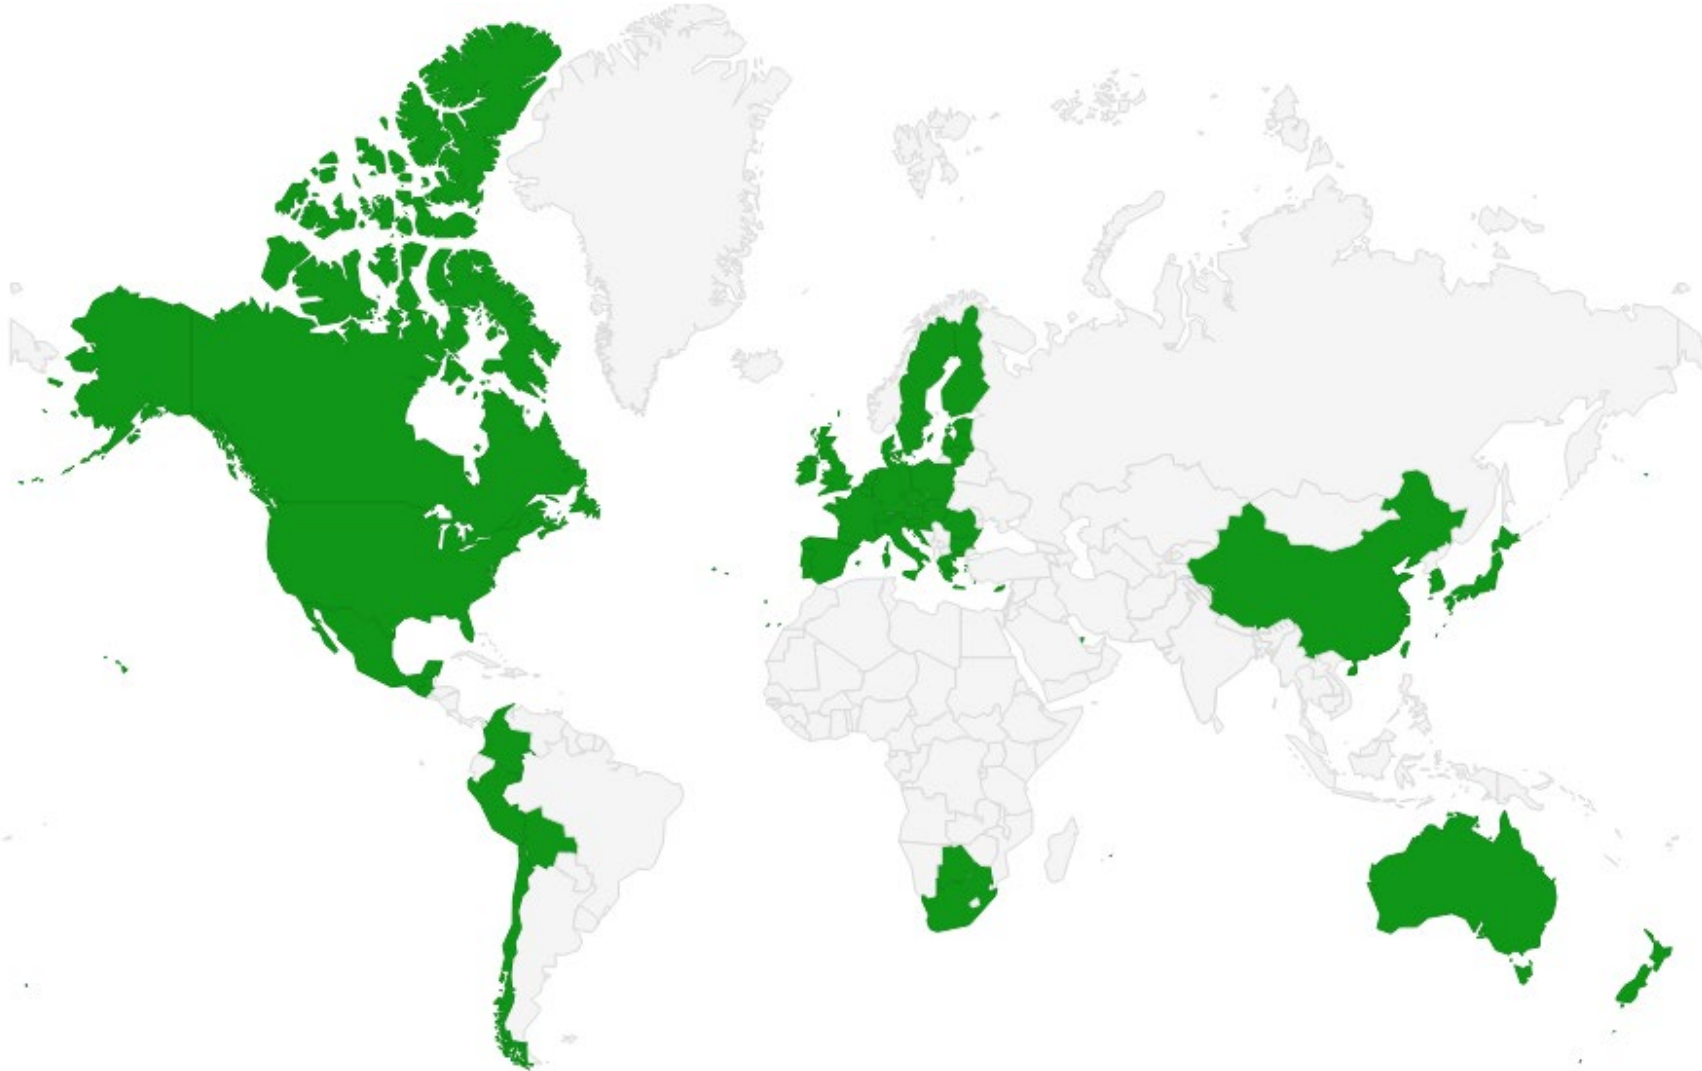

Transportation Mode is available for 48 countries accounting for 75% of total trade.

- Trade flows by sea, air and land transport modes.

- Greater detail on rail, road, pipeline, and containerized and non-containerized seaborne trade available for some countries.

Extra Data Fields: Re-exports and Tariff Regimes

Understand complex supply chains using **Re-Export** and **Tariff Regime** data.

Coverage includes the following countries as shown in the map:
- Bahrain
- Brunei Darussalam
- China
- Hong Kong*
- Indonesia
- Malaysia
- Qatar
- Singapore

Additional countries with re-export/tariff regime data include:
- Belize
- Botswana
- Costa Rica
- Mauritius

* Includes Country of Origin and Destination Country

Belt and Road Coverage
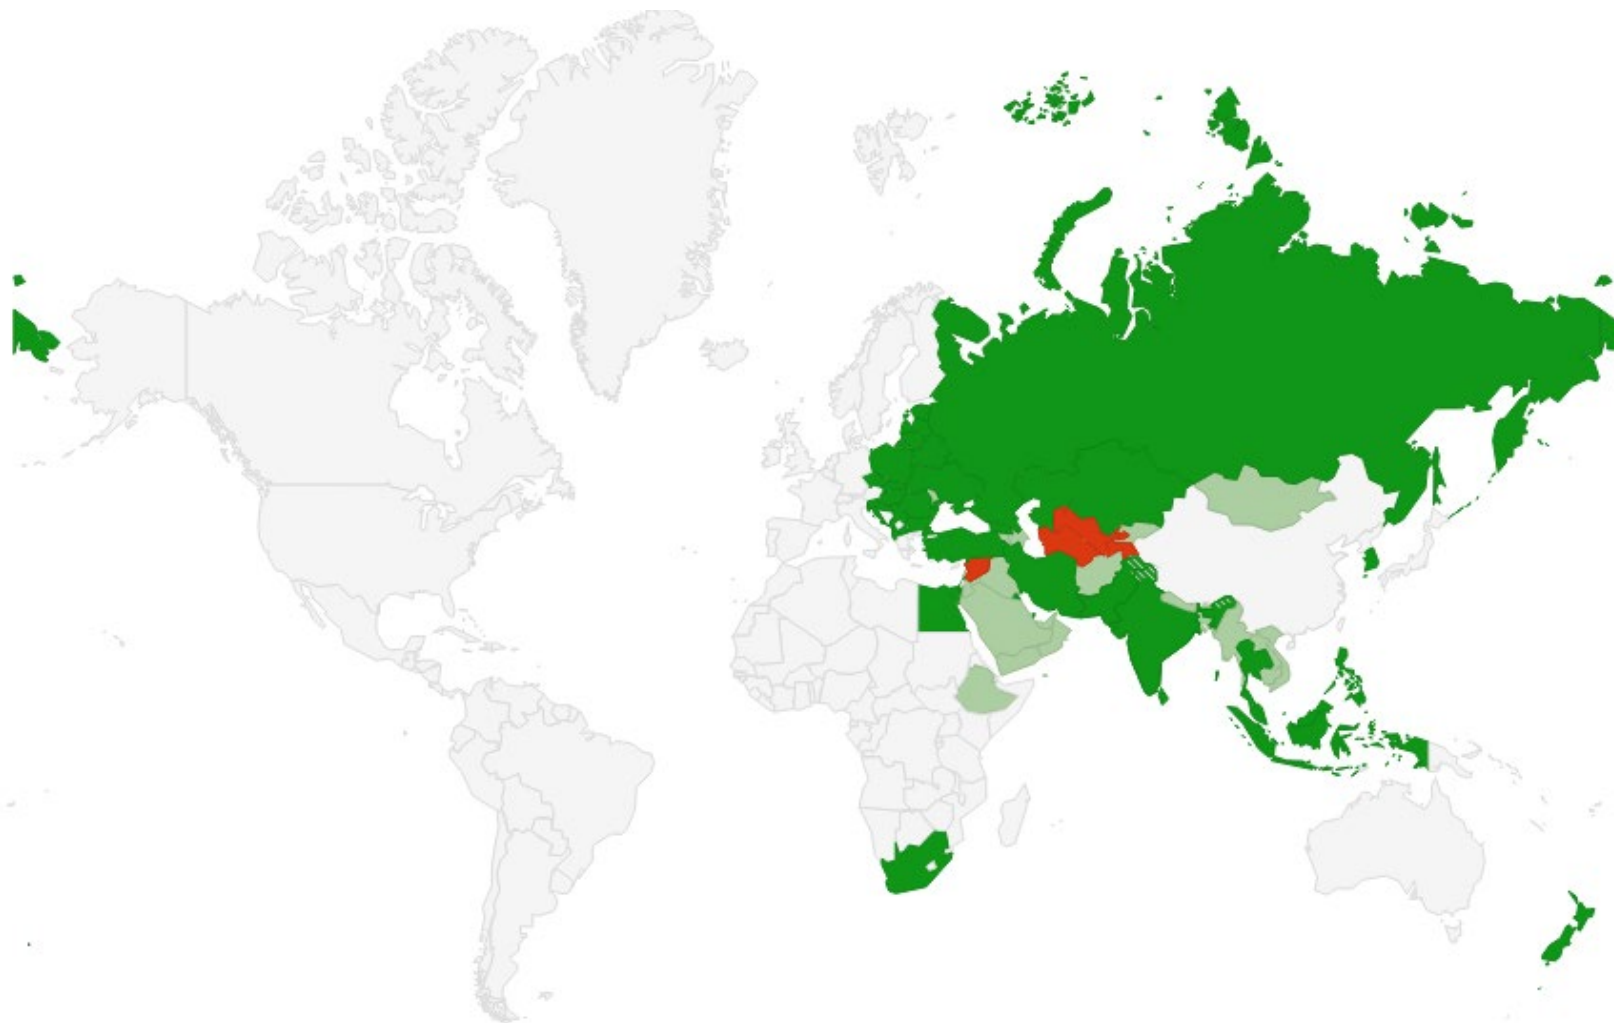

68 Participating Countries (per HK Trade and Development Council)

GTA Coverage:
Monthly: 40 Countries
Annual: 23 Countries

Monthly	75.1%
Annual	23.6%
Not Reporting	1.2%

As a percentage of total trade with China among Belt and Road participants (per China Customs)

Supplementary GTA features :

1) the import & export data is **updated three times weekly** (list of countries available on request)
2) historical revisions includes three previous years
3) **after sales support available either in country or in region**
4) commodity average unit prices & commodity reported values available in multiple currency conversions
5) data access is maintained at one primary site & two reserve sites for secure access
6) available historical data is never deleted

Improved navigation	**Longer time frames**	**Easy export**
Drill down options for clearer data exploration	Up to 12 periods per report & easy adjustment of timeline with slider	Export automatically refreshed or static files to Excel or CSV

Clearer data extract workflow	More options	Fewer repetitive tasks
All options in one place, with criteria imported from standard reports	Commodity descriptions, both trade directions, multiple HS detail levels, & unit conversions	Search multiple commodities (at different detail levels) or groups of groups in one extract

Global Trade Atlas: Main Module

Download data directly	Schedule updates	Save, edit, and modify
Download data directly through the browser for reliable delivery of larger files	Schedule a task to run routinely with email notifications	Save time when running multiple similar data extracts or refining an earlier download

Written analysis and methodology documentation

Trade and transportation focused headline analysis will accompany increased supporting documentation and training material

IHS Markit™

Key Benefits to Connect Application
Global Trade Atlas Highlights

- Data Extracts: more reliable with improved capabilities
  - > Scheduled reports with e-mail notifications
  - > Commodity descriptions included with codes
  - > Download through browser (download larger amounts of data more reliably)
  - > Both trade directions and multiple HS levels in one extract for quicker analysis
  - > Edit saved searches and previously data extracts

- Improved Navigation and Ease-of-use
  - > Multi-select HS codes, product groups, or partner countries as filters
  - > Faster and more transparent navigation with recent and saved searches
  - > Clearly defined drill down paths with more options
  - > Change any report criteria without restarting the search

- Extended time ranges in reports and downloads – 60 time periods

- Improved Excel downloads and streamlined process for refreshable files
  - > Charts exportable for editing in Excel and PowerPoint

- Improved capabilities for sharing and managing saved reports and groups

- More documentation and supporting written content
